## About Ardcairnie Angus:

Since we started our on-farm bull sales on Maybenup in 1999, not much has changed in the sale day format. We still publish our catalogue in-house, we still put a price (excluding GST) on every bull in the catalogue, we still use a lot of AI to ensure genetic diversity for ourselves and our clients, we still present the bulls in 'fit not fat' condition, and apart from a Fixed Time AI programme with the first calvers each year, all mating is on natural cycles.

We still don't cut corners in the collection and processing of meaningful information - for example verifying sires, collecting the data for Breedplan (now TACE = TransTasman Angus Cattle Evaluation), semen testing and morphology assessment, genetic condition testing and vaccination programs and more recently, genomics. We still cull for unacceptable conformation, temperament, EBVs and \$Indexes.

Our philosophy of presenting our bulls in working condition is to increase their chance of a long and fertile life. We know many of our clients understand and accept our philosophy and we respect and appreciate their support over the years.

BUT change is always happening! Early in 2020, we made the decision to do one more calving, one more mating and one more bull sale then move to the next stage of our lives.

That stage does not involved a breeding operation (so no bulls retained for our own use) therefore **EVERY** bull we have available for purchase for breeding, after each has passed all the tests we put them through, is in this 2021 catalogue. That will give maximum choice to potential customers on sale day.

**Just a reminder: ownership of a bull bought at an auction sale transfers to the buyer at the fall of the hammer.** Elders Insurance Authorised Representatives David and Callum Froby from Katanning will be at our sale should you wish to use their advice and assistance.

## The Angus Selection Indexes

*There was a momentary change to Index calculations mid-December 2020 but after Board consideration, TACE reverted to the system used before; lots of discussion will happen in 2021 before any changes to, for example, EBV weightings, are made.*

**Angus Breeding Index:** self replacing herd; daughters retained for breeding; identifies animals that will improve overall profitability in the majority of commercial grass and grain finishing systems.

**Domestic Index:** self replacing herd; daughters retained for breeding; steer progeny finished on either pasture, pasture supplemented with grain, or grain targeting the domestic supermarket trade; steer progeny slaughtered at a carcass weight of 270kg at 16 months of age; eating quality traits important to suit MSA program,

**Heavy Grain Index:** self replacing herd; daughters retained for breeding; steer progeny pasture grown with a 200 day feedlot finishing period; steer progeny slaughtered at a carcass weight of 420kg at 24 months of age; targeting high quality, highly marbled markets with a significant premium for superior marbling.

**Heavy Grass Index:** self replacing herd; daughters retained for breeding; steer progeny finished on pasture; steer progeny slaughtered at a carcass weight of 340kg at 22 months of age; eating quality traits important to suit MSA program.

The complimentary light lunch includes beef from The Meat Machine (was the Beef Shop),  
2/2043 Albany Highway, Maddington Phone 9452 8400

## Continuing for our 2021 Bull Sale as YOUR success is our aim!

- ✓ Every bull in the catalogue has been Angus GS assessed to give further accuracy to EBVs and \$Index information. The sire verification for all bulls listed continues, and PLUS Maybenup/Ardcairnie Angus retains the J-BAS 8 status.
- ✓ Sires new to Ardcairnie for the 2019 born bulls include Baldrige Beast Mode, Millah Murrah Loch Up L133, Chiltern Moe, Musgrave Mediator, Baldrige Compass, Blackrock M106 and M17, Ardcairnie M10, M117, M214 and M218. Proven sires with sons in the sale team include Ardcairnie F96 (ASBP Cohort 3), Ardcairnie J27 (Cohort 6) and Koojan Hills Reality K46. There's total of 22 Sires represented in this 2021 sale team of 61.
- ✓ All bulls are free by test or pedigree of four genetic conditions for which Angus Australia has tests. Arthrogyrosis Multiplex (AM), Neuropathic Hydrocephalus (NH), Contractural Arachnodactyly (CA), and Developmental Duplication (DD): **We do not sell carrier or suspect carriers.**
- ✓ All bulls have been vaccinated with Vibrovax, Ultravac 7 in 1, and Pestigard (20<sup>th</sup> March and 16<sup>th</sup> April 2020); boosters on 8<sup>th</sup> December 2020); all ear notch tested negative for BVDV.
- ✓ Each catalogued bull has been semen tested by Dr Kate Clayton, Kojonup Vet Hospital and morphology assessed by Just Genes in Queensland; each one catalogued has passed the motility and % normal sperm tests. **PLEASE NOTE:** a few bulls required further testing; results may mean some withdrawals from the catalogue on sale day.

### THE CHANGES:

- ✓ **NO Bed & Breakfast offer:** all sold bulls must be removed from Maybenup by Tuesday 16<sup>th</sup> February 2021.
- ✓ If there are any unsold bulls at the end of the sale, they may be taken to our son's property at Wokalup and be available from there BUT that's not definite. We will let you know via our website and our usual after-sale letter to our mailing list. If you might need an Ardcairnie bull for the next mating season, please come to the sale!

There was a hiccup at the Angus Australia office with not all the data submitted in October being included in the TACE analysis; not noticed by us until catalogue preparation, so the January 2021 data in the catalogue has incomplete input. The mid-January run will have all the data included - please check our website for the updated data in the week beginning 18<sup>th</sup> January. Ring us if you'd like us to send you a copy.

The new stud owners are the Dewar Family from Guilderton; all the cows, 2020 born calves, pregnant Q heifers and herd bulls are now in their new home. We are delighted and pleased that Frank and family plan to continue running the herd as Ardcairnie Angus Stud. We will be giving them our mailing and buyer lists so expect to hear from them in the next 12 months. Should you rather we don't include your contact details, please let us know. All being well, you will be able to meet some of the Dewar Family on 2<sup>nd</sup> February at Maybenup.

**COME VISIT BEFORE THE SALE TO LOOK AT THE BULLS IN THEIR Paddock:**  
**We welcome visitors at any time - please ring to arrange a mutually convenient time**  
**08 9831 0401 or 0417 942 326**

**ELDERS RURAL SERVICES** are our **Conducting Agents:**  
Kojonup Office 9831 1088; Jamie Hart 0427 910 955;  
Tim Spicer 0427 812 194

**AGENTS OTHER THAN ELDERS:** A 3% rebate is offered to an agent other than an Elders agent present at the sale introducing new business to the sale when nominated in writing 24 hours prior to the sale.  
Fax: 08 9831 0404; Email: MAYBENUP@bigpond.com

**SELLING SYSTEM:** Our unique selling system is buyer friendly - the price listed for each bull is our minimum selling price (excludes GST). On the day, Elders auctioneer will offer each bull in catalogue order. If there's no interest, he will move to the next one; if one person is interested, she/he secures the bull at that price; more than one person interested, an auction will be conducted using the catalogue price as the starting price.  
**Bids will be \$250/bid.**

**If you'd like a lot brought up the order, please talk to Elders Auctioneer Nathan King and Stud Stock Manager Tim Spicer on the day.**

**BUYERS INSTRUCTION SHEETS:** These will be available at the registration desk.

**AGES OF OUR BULLS:** At Ardcairn we calve down from early April to mid July. Lot 1, Q9, was born on 24 March 2019; Lot 61, Q319 on 18 June, 2019.

**CATALOGUE ORDER:** The bulls are catalogued and penned in age order to allow meaningful physical age comparisons.

**TRANSFERS:** We will continue, through Angus Australia, to transfer ownership of the bulls to their new owner and we will transfer bulls on the NLIS database when the bull(s) leave Maybenup.

**Our next stage:**

As this catalogue is being prepared, the paperwork still has to be completed on our purchase of a small property near the west coast. We remain very interested in the cattle industry and value immensely the friendships made over the years – we are downsizing, not retiring. and look forward to continuing those friendships at cattle industry events into the future. Our mobile phone number stays the same (0417 942 326) so feel free to ring us for a cattle chat anytime!  
Your support over the years – it is, and has been, very much appreciated – thank you all.

***More information: Percentile Bands for all 2019 born animals is on the back page.***

Q319	AMFU,CAFU,DDFU,NHFU

The first two letters of the code indicate the genetic condition, with the status of each animal displayed as follows:

- \_\_ F Free Indicates that the sample submitted for the animal has been tested and found to be free of the causative mutation responsible for the condition.
- \_\_ C Carrier Indicates that the sample submitted for the animal has been tested and found to be a carrier of the causative mutation responsible for the condition.
- \_\_ FU Free Untested Indicates that, based on the pedigree information supplied by the breeder of the animal, the animal is expected to be free of the mutation responsible for the condition but has not been tested.
- \_\_ \_% Carrier Indicates that, based on the pedigree information supplied by the breeder of the animal, the animal has a chance of being a carrier of the mutation responsible for the condition but has not been tested.
- \_\_ A Affected Indicates that the sample submitted for this animal has been tested and the animal found to be homozygous for the mutation responsible for the genetic condition and have two copies of the mutant variant of the gene
